ABOUT ME

COMMUNICATION AND ADVERTISING STUDENT

I create content systems that connect creative production with audience data. My experience spans AI learning communications, short-form video, social media operations, and live brand events in China and France.

My current focus

- AI and digital media communication
- Content strategy and platform operations
- Bilingual storytelling in English and Chinese

400+

pieces of company and personal content

1.39M+

highest reach for one post

ENFJ / Mandarin native / English B2 / French B2

CORE SKILLS

CONTENT

Topic research
Scriptwriting
Narrative structure
Bilingual copy

OPERATIONS

Account management
Content distribution
Trend monitoring
Community interaction

PRODUCTION

Filming
Premiere Pro and CapCut
Photoshop and InDesign
Canva

ANALYTICS

Views and completion
Engagement and
conversion
Performance review
Content optimisation

Tools: Premiere Pro, CapCut, Photoshop, InDesign, Canva, ChatGPT and Microsoft Copilot

LENOVO AI LEARNING PLATFORM

INTERNAL CONTENT OPERATIONS / MAY TO JULY 2026

I supported the launch and daily operation of an internal AI learning platform for employees. My work connected course publishing, bilingual promotion, video production, session documentation, and recognition content.

10,000+

platform visits

8

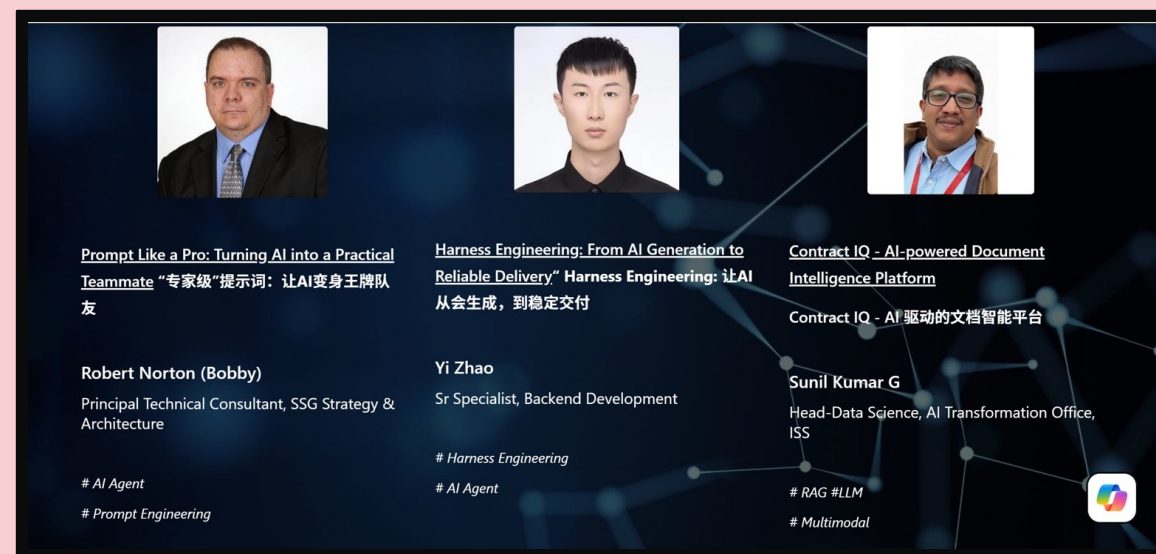

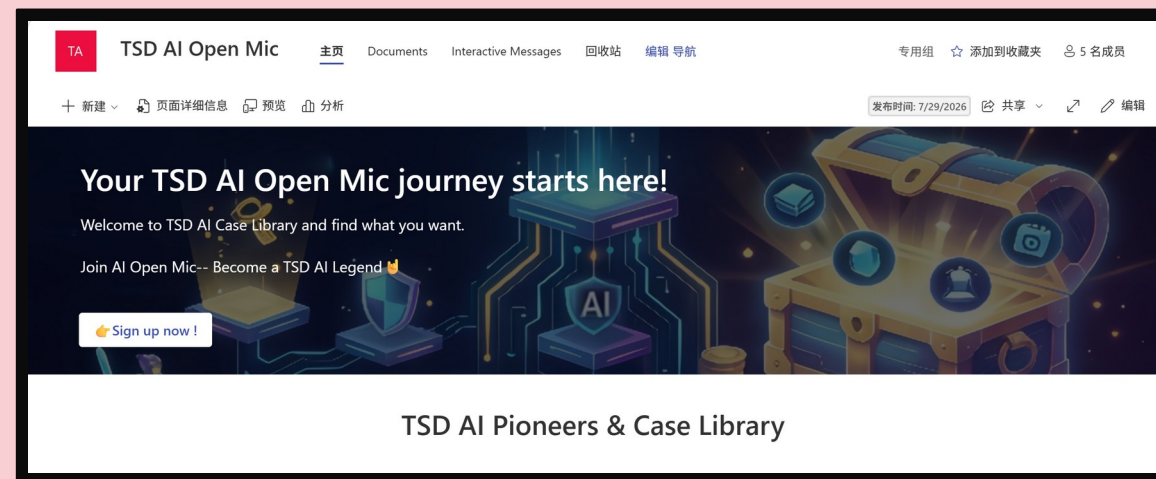

course releases

5,000+

campaign impressions

MY ROLE

Platform content operations, bilingual copywriting, promotional design, video editing, course documentation, and cross-team coordination.

FROM LIVE SESSION TO REUSABLE CONTENT

CONTENT WORKFLOW

- 01

Prepare

Align with the speaker, define the topic, and collect source materials.
- 02

Promote

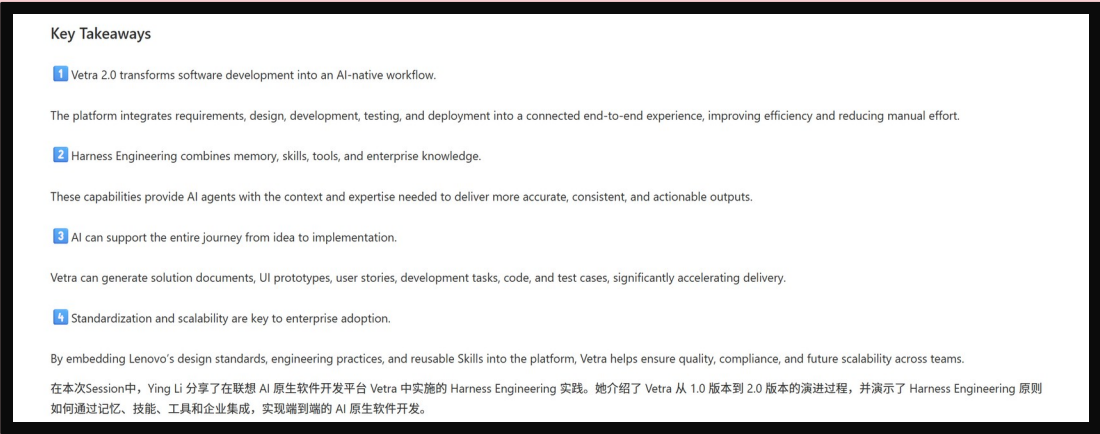

Create bilingual posters, teasers, and joining information for employees.
- 03

Publish

Edit the recording, package the course, and update the platform page.
- 04

Document

Write concise session summaries and key takeaways for later learning.

Each session became a structured asset that employees could revisit after the live event.

BILINGUAL EDITORIAL OUTPUT

ENGLISH AND CHINESE LEARNING CONTENT

I converted technical presentations into short, readable summaries for a global internal audience. The format combined a session overview with four or five key takeaways, using consistent terminology across both languages.

- Clarified complex AI topics without overstating technical claims
- Standardised titles, speaker information, keywords, and course descriptions
- Maintained a consistent editorial structure across releases

Deliverables included course introductions, event copy, meeting summaries, and six employee-recognition posters.

5 Enterprise deployment requires both business value and governance.

Beyond technical capabilities, the platform incorporates security, legal, and compliance reviews, while future enhancements include conversational interactions, document comparison, and memory-based user experiences.

在本次Session中，Sunil Kumar 分享了 Contract IQ——一个由人工智能驱动的文档智能平台，旨在帮助组织从合同及其他商业文档中提取、分析和管理关键信息。他介绍了与人工文档审阅相关的业务挑战，阐述了平台架构，演示了其功能，并讨论了未来的增强功能及企业级采纳考量。

Key Takeaways

1 Contract IQ 将文档管理从“存储”转变为“智能”。

该平台帮助组织快速识别关键信息，如义务条款、续约条款、服务水平协议（SLA）、罚则和合规要求，大幅减少人工审阅文档的工作量。

2 AI驱动的文档处理显著提升效率。

通过OCR（光学字符识别）、文档分块、语义搜索和大语言模型，Contract IQ 可在数秒或数分钟内完成大型文档的分析并提取关键洞察，而无需耗费数小时。

3 可靠性和可追溯性对于AI的采用至关重要。

该平台提供页码引用、行级引文、高亮源文本及置信度评分，使用户能够验证AI生成的结果，从而建立对输出的信任。

4 该解决方案面向业务用户设计，而不仅限于技术团队。

凭借基于浏览器的界面、对多种文档格式的支持以及零编码要求，用户可以轻松上传文档并检索所需信息。

5 企业级部署需要兼顾业务价值与治理。

除技术能力外，该平台还纳入了安全、法务和合规审查，未来的增强功能包括对话交互、文档对比和基于记忆的用户体验。

Key Takeaways

1 Vetra 2.0 transforms software development into an AI-native workflow.

The platform integrates requirements, design, development, testing, and deployment into a connected end-to-end experience, improving efficiency and reducing manual effort.

2 Harness Engineering combines memory, skills, tools, and enterprise knowledge.

These capabilities provide AI agents with the context and expertise needed to deliver more accurate, consistent, and actionable outputs.

3 AI can support the entire journey from idea to implementation.

Vetra can generate solution documents, UI prototypes, user stories, development tasks, code, and test cases, significantly accelerating delivery.

4 Standardization and scalability are key to enterprise adoption.

By embedding Lenovo's design standards, engineering practices, and reusable Skills into the platform, Vetra helps ensure quality, compliance, and future scalability across teams.

在本次Session中，Ying Li 分享了在联想 AI 原生软件开发平台 Vetra 中实施的 Harness Engineering 实践。她介绍了 Vetra 从 1.0 版本到 2.0 版本的演进过程，并演示了 Harness Engineering 原则如何通过记忆、技能、工具和企业集成，实现端到端的 AI 原生软件开发。

CONTENT AND E-COMMERCE OPERATIONS

JIUDAFU IMPORT AND EXPORT TRADING / PARIS

I managed the full short-form video workflow, from topic selection and scripting to filming, editing, publishing, and performance review. I also supported livestream pacing and audience interaction.

350+

image and text posts

60+

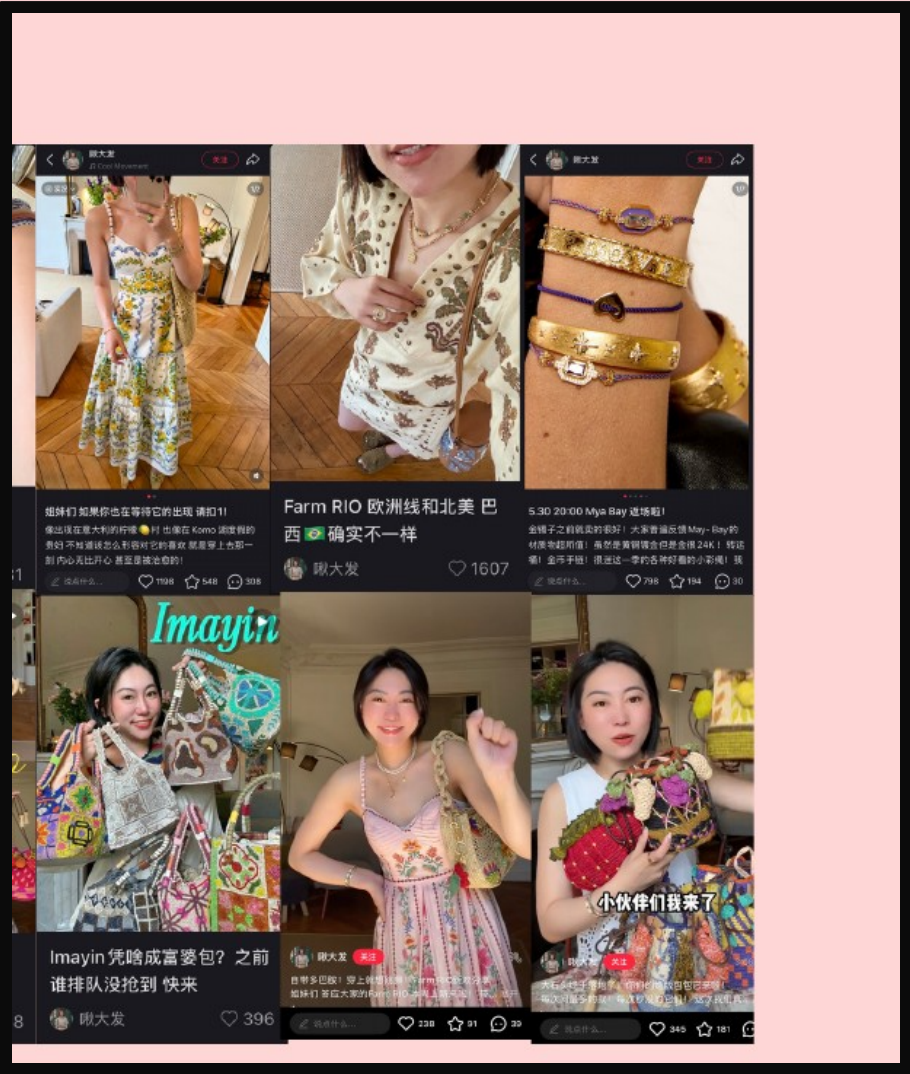

short-form videos

~20%

increase in exposure

DATA-LED CHANGES

Low completion prompted stronger openings. Weak interaction led to clearer comment prompts. Publishing times changed according to platform activity and content performance.

FROM SHARING TO LIVE COMMERCE

XIAOHONGSHU / LUXURY RETAIL / OCT 2025 - SEP 2026

I helped an established luxury-content account expand into cross-border livestream selling, connecting products in France with buyers in China.

MY ROLE

Data analysis, marketing strategy and live operations. I reviewed viewing, retention and conversion data to inform content and livestream adjustments.

RMB 2.56M

MONTHLY PAID SALES / RMB THOUSANDS

OPERATING INSIGHT

More frequent streams accompanied the January and June peaks. Cross-border delivery waits were a key refund reason reported by the team: conversion also depends on delivery expectations.

Source: 11 monthly Qianfan records; August zero activity confirmed by the team. Results are before operating costs.

JANUARY / RMB 683,888 AFTER REFUNDS

JUNE / RMB 991,500 PAID SALES

Original Qianfan dashboard crops; figures and Chinese unchanged.

SERENI'THÉ CHINESE NEW YEAR

BRAND COLLABORATION AND CULTURAL EVENT / FEBRUARY 2026

Our student team partnered with a Paris tea house to design and promote a Chinese New Year event. The programme combined tea culture with calligraphy, knot making, and dumpling activities.

MY CONTRIBUTION

- Developed the campaign direction around a calm, contemporary expression of Chinese culture
- Created social content and promotional materials that matched the brand's visual identity
- Supported event execution and post-event communication

ALKIMIA BY MARMITON

STUDENT DIGITAL PRODUCT AND MARKETING PROJECT

Alkimia is a concept for an affordable DIY beauty platform aimed at students and young adults. The project responded to rising personal care costs and strong social interest in simple, home-made beauty routines.

PRODUCT IDEA

- Personalised skin and hair diagnosis
- Recipes based on available ingredients and limited time
- Stock and expiry tracking to reduce waste
- Community advice and student offers

Executive Summary

ALKIMIA
by marmiton

ESP Paris 2025-2026

Alkimia, l'alchimie naturelle qui simplifie la vie des étudiants

LA TEAM COSMOS

La créative, qui imagine et donne vie aux idées

Maria

L'organisatrice du digital, qui structure, optimise et fait avancer efficacement

Paulina

La cheffe de projet, qui pilote et coordonne avec vision

Ninon

La digitale, qui maîtrise les outils et développe la présence en ligne

Tianran

LE MARCHÉ

- Les étudiants et leurs achats de produits d'hygiène beauté: Face à l'inflation 54 % des étudiants réduisent leurs dépenses de soins personnels.
- La tendance croissante du DIY: 8,5 milliards, nombre de vues des contenus liés au "DIY beauty" sur les réseaux sociaux.
- 51 % de la communauté étudiante a moins de 50 € pour finir le mois.
- Près d'un Français sur deux limite ses achats de produits d'hygiène par manque d'argent

INSIGHT

Les étudiants sacrifient leur hygiène et leur bien-être à cause de l'inflation, mais cherchent activement des alternatives créatives et économiques sur les réseaux sociaux.

LE CONCEPT

Une plateforme de cosmétique "fait maison" conçue pour lever les trois freins étudiants : le budget, le temps et la sécurité.

L'expérience est personnalisée grâce à un diagnostic de peau et de cheveux, afin de proposer des recettes adaptées à chaque profil.

- Accessibilité : Site responsive proposant des recettes DIY en moins de 15 minutes avec peu d'ingrédients.
- Économie circulaire : Fonctionnalité "Mon Stock Étudiant" pour utiliser ce qu'on a déjà et liste de courses optimisée.
- Sécurité & Accompagnement : Diagnostic personnalisé, suivi des dates de péremption et conseils de conservation validés.
- Communauté : Espace d'entraide avec avis et partage de bons plans entre étudiants.

Pourquoi Marmiton ?

- En tant que leader du "fait maison", Marmiton apporte la crédibilité et le savoir-faire nécessaires pour rassurer les étudiants sur la fiabilité des recettes cosmétiques.

Notre ambition est de rendre la cosmétique maison accessible, économique et adaptée au rythme de vie étudiant.

PARCOURS UTILISATEUR

DIGITAL PRODUCT AND GO-TO-MARKET LOGIC

MY FOCUS: DIGITAL STRATEGY AND ONLINE PRESENCE

I translated the research into audience profiles, a user journey, and a multi-channel launch plan. The strategy prioritised TikTok and Instagram for discovery, with Pinterest and YouTube supporting tutorials and longer-term search.

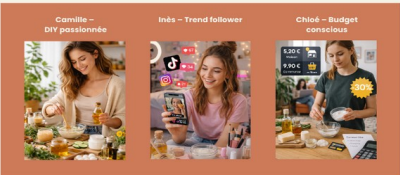

AUDIENCE	Women aged 18 to 25 who want reliable DIY beauty solutions on a limited budget.
CONTENT	Creator partnerships, user-generated content, seasonal campaigns, and pop-up events.
BUSINESS MODEL	Free core content with premium features, brand partnerships, advertising, and affiliate revenue.

AVANTAGES

- Économie : recettes DIY moins chères avec coût estimé.
- Rapidité : recettes DIY simples en moins de 15 min.
- Optimisation : ingrédients déjà disponibles ("Mon Stock Étudiant"), moins de gaspillage.
- Fiabilité : suivi des dates + conseils pro.
- Personnalisation : diagnostic, avis, communauté, gamification.
- Exclusivité : contenu premium et avantages étudiants.

POUR QUI ?

- Femmes 18–25 ans
- Étudiantes ou actives
- Intérêt : beauté naturelle & DIY
- Solutions simples et fiables
- Soins faits maison
- Budget maîtrisé

Stratégie

La stratégie repose sur une forte présence digitale (TikTok, Instagram, Pinterest, YouTube), combinée à des collaborations avec des influenceurs et une stratégie UGC. Des campagnes saisonnières (Journée des femmes, Noël...) et des événements comme le **DIY Beauty Bar Pop-up** renforceront la visibilité du site.

Le site adopte un modèle freemium, avec un accès gratuit aux contenus principaux et des fonctionnalités premium. Cette approche permet d'attirer un large public tout en développant progressivement la monétisation.

BUDGET

- Site web: **29 700€**
- Collaboration réseaux sociaux: **1 000€**
- Nom: **7,99 €** / par ans
- Ads: **1 000 €**

Prévisions

Le site vise **50 000 visites mensuelles** en 6 mois et **20 000 utilisateurs** la première année. Le chiffre d'affaires est estimé entre **20 000 € et 40 000 €** la première année, avec une croissance progressive.

Sources de revenus

Les revenus proviennent des **abonnements premium**, de la **publicité**, des **partenariats avec des marques** et de l'**affiliation**. À long terme, le projet pourra évoluer vers la vente de kits DIY.

- **Marmiton** marque hébergeur qui **finance le site web** et sa campagne

N+1

- disponibilité dans toute la France
- Version premium
- Assistant d'achat intelligent: suggestions selon le stock, budget et recettes favorites
- Élargissement de la cible

N+2

- Amélioration des fonctionnalisés
- Lancement d'une application
- Disponible dans l'Europe

FILM AND MUSIC CONTENT ACCOUNTS

PERSONAL PROJECT / WEIBO AND XIAOHONGSHU

I produced entertainment content around films, variety shows, artists, and cultural moments. Fast topic selection and clear emotional framing helped individual posts travel beyond the existing audience.

70+

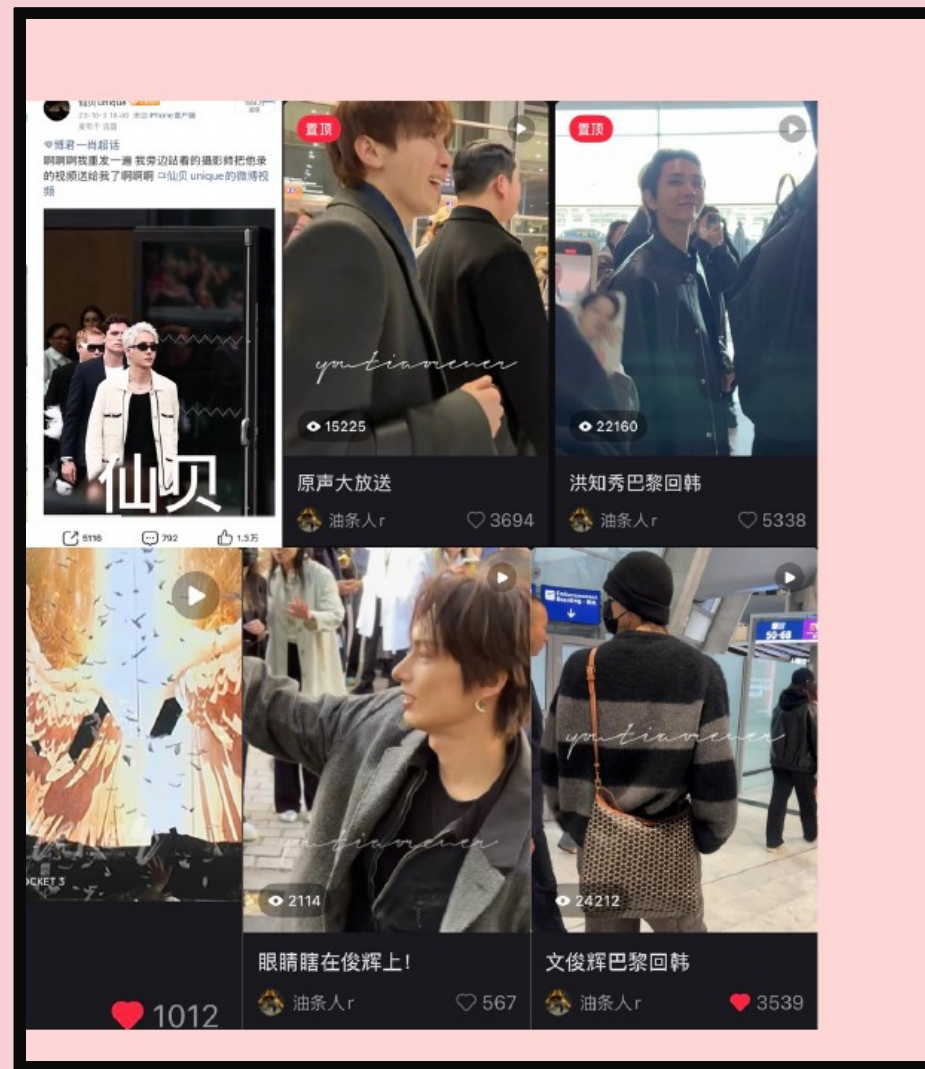

published posts

1.39M+

highest reach

WORKING METHOD

- Track entertainment news and identify topics with strong sharing potential
- Lead with the key information and strengthen the title's emotional angle
- Review comments, reposts, and publishing time to refine the next release

CONTENT OPERATIONS METHOD

A REPEATABLE FIVE-STEP PROCESS

01 Find the signal

Monitor platform trends, audience questions, and live performance data.

02 Understand the format

Break down the opening, pacing, visual language, and interaction design.

03 Create quickly

Turn the insight into a practical script, asset, event message, or course page.

04 Measure response

Review viewing, completion, interaction, and conversion where relevant.

05 Improve the next release

Change the structure, timing, or call to action using the strongest evidence.

THANK YOU.
